

Rockville, MD 20853

To whom it may concern:

Mr. Eidlin has provided a number of repairs on the inside and outside of our home over a ten year period. My wife and I have found Mr. Eidlin to be technically competent, personally reliable, thorough, and the prices for his labor clear and fair.

Mr. Eidlin has done a variety of work for us including roof repair, replacing shutters on the first and second floors of our house, replaced the subfloor and tile floor in one of our upstairs bathrooms. He has replaced sockets, ceiling light fixtures, and wired our garage to have additional internal and external outlets as well as an additional external light fixture at the back of the house.

Mr. Eidlin explains thoroughly what needs to be done to fix a problem, and gives a detailed estimate beforehand. He and the several workers he supervises (for a larger job) are always courteous and take the time to answer questions accurately and completely.

My wife and I have recommended Mr. Eidlin to our neighbors several of whom have used his services for fairly large jobs because of his technical competence and versatility as well as his reliability.

Sincerely yours,

Harold
